Attila Hartmann

<role> AI Engineer · Agentic Systems & Angular </role>

Budapest-based AI engineer and Angular developer. I build agentic systems that turn enterprise workflows into safe, measurable automation, and the human-in-the-loop UIs around them. Ten years in business roles before software: I start from the process, the risk and the ROI.

$ work_history --order=desc

@ Fornax ICT Kft.

// workflow · records management · GIS · telecom & public sector

▸ AI Engineer

2026.02 → **now**

→ Built and own fornax-fe, an agentic delivery toolkit on Claude Code used by 4–6 developers across 5 enterprise repos: work item → analysis → plan → implementation → CI-parity checks → reviewer sub-agent → browser QA via MCP → merge request.

→ Self-improving learning loop: corrections and failed quality gates become CI-validated, auto-merged lessons. First 3 weeks: 127 lessons, 39 auto-merged MRs, 9 promoted to team rules.

→ Guardrails by design (human approval gates, protected paths, git guard hooks); cost control by routing bulk work to cheaper OpenAI-compatible models; ~1.6k lines of Python tooling (Azure DevOps & GitLab APIs, validators).

→ Rolled out AI-assisted development to the team; contributed AI features from PoC and presales to production, incl. a design-to-code pipeline (AI mockups → Angular).

stack: Claude Code · sub-agents · MCP · hooks · Python · Anthropic & OpenAI-compatible APIs · Playwright MCP · GitLab CI

▸ Frontend Developer

2023.03 → **now**

→ Angular UIs and a shared component library (PrimeNG, NG-ZORRO, Material) for workflow, records-management and GIS platforms: data-heavy tables, dashboards, dynamic forms, map views.

→ End-to-end features: PostgreSQL/Liquibase migrations, jBPM process and form definitions, Keycloak/OAuth2 access control, Spring Boot contributions; own a Node.js/Express GitLab ↔ Azure DevOps webhook service.

→ Quality: built a Java Selenium UI-test framework (Maven, Allure); Playwright, Vitest, SonarQube quality gates.

stack: Angular · TypeScript · RxJS · NgRx · Node.js · Java 17 · PostgreSQL · Docker · Keycloak

---

▸ Frontend Developer / IT Business Analyst

2022.01 → 2023.03

@ Digitális Kormányzati Fejlesztés és Projektmenedzsment Kft.

→ Angular development and business analysis for digital-government projects: requirement specs, procurement templates, service-design workshops.

▸ Business & project roles

2012–2022

Real-estate business analyst (financial models, feasibility studies) → project coordinator & manager in international programmes (USA, UK, CEE partners) → public-education procurement and EU grants.

$ ls ~/projects

▸ Clearline

open source · live demo

Agentic complaint resolution for banking: LangGraph agent with human approval and audit trail, hybrid RAG in Postgres, read-only tools on an MCP server, evals as a CI gate (97% right decisions, ~$0.003 per case), OpenTelemetry tracing. // Python · LangGraph · FastAPI · pgvector · MCP · OpenTelemetry · Angular · Docker

↗ github.com/Attila-Hartmann/clearline

▸ Claimdesk

open source · live on AWS

Insurance claims document AI: a LoRA fine-tuned Qwen3-4B beats Claude Haiku on held-out documents (95.5% vs 80.7% fully correct) at ~46x lower cost per document; OCR, classical-ML routing, XGBoost fraud scoring with SHAP, MLflow registry, canary rollout with automatic promotion or rollback. // Python · TRL/LoRA · vLLM · Modal · MLflow · XGBoost · AWS Lambda/Bedrock · Terraform · React

> **ai_engineering**

LangGraph & Claude Code agents · RAG (pgvector, hybrid) · LLM evals · LoRA fine-tuning · vLLM · MLflow · XGBoost · MCP · OpenTelemetry · Anthropic & OpenAI-compatible APIs · Python / FastAPI

> **backend**

Node.js / Express · Java 17 · Spring Boot (contrib.) · PostgreSQL · Liquibase · REST & webhooks · Keycloak

> **frontend**

Angular · TypeScript · RxJS · NgRx · PrimeNG · NG-ZORRO · Material · Next.js / React

> **delivery**

AWS (Lambda, Bedrock, S3) · Terraform · Docker · GitLab CI/CD · SonarQube · Playwright · Vitest · Azure DevOps

> **now_building**

Azure AI (Azure OpenAI, AI Foundry) · Kubernetes

education

MSc, Business Development

Corvinus University of Budapest · 2011–2014

BSc, Business Admin. & Mgmt.

Corvinus University of Budapest · 2007–2010

Junior Frontend Developer

PROGmasters Developer School · 2021–2022

e-Administration Expert

Königsberg Consulting · 2022

// fun_fact()

In summer 2015 I walked the Camino de Santiago: 850 km across northern Spain.
